

The LibSuite<sup>®</sup> Professional version is a totally integrated Information Management System designed specifically for efficient management of a Library. This is achieved by structuring the processes and work flow within a library into functionally independent modules catering to different tasks so as to result into optimum resource management. LibSuite<sup>®</sup> Professional uses Client-Server Technology, which enables all the users of the library to access its records.

- Global Change facility
- Author, Language, Currency, Publisher, Place Authority files
- All Masters/Authority files in one user interface
- Stock Verification using bar codes
- Subjects Setup with Classification
- Member Information
- Library Details for Inter Library Loan
- Annual Budget details
- User Defined Letters

Corporate Libraries , Large Schools normally have substantially high collections and it is not possible for them to maintain these collections becomes very difficult without a robust back end like SQL Server or Oracle Libsuite<sup>®</sup> Professional works with any standard back end like SQL Server , Oracle , Sybase etc. The main modules of Libsuite<sup>®</sup> Professional are Cataloguing , Circulation , Queries , Serial Control , Acquisition , Housekeeping etc. All these modules are functionally very rich and offer many useful features for the Librarians. Some of the highlights of Libsuite<sup>®</sup> Professional are:
