

Corporate lobbies have specific needs of their own. Corporate lobbies are difficult to manage. While you want to maintain a strict security control, you do not want your guests to go through a very tedious and time consuming process.

In schools a badge can be issued to every parent with all the details like name, Children's name etc.

Lobbytech offers you a unique solution, to manage your visitors with a very interactive and a user friendly software. You can create badges. Create a data repository and refer to the same with zero time lag.

In the modern world security has become a major concern to every organization. Government Organization, Public Buildings, Schools - the level of security needs might differ but effective security management is the need of the day.

Normally Surveillance Cameras, Access Control system etc are installed by organization to enhance the security but - 'a visitor' who is a stranger to the organization also needs a monitoring from security perspective. Typically organizations keep a register or book in which the visitor would scribble his/her details and a temporary badge or a sticker is pasted on his dress. There are hardly any details that can be added on this badge and when it comes to going through the past details/visits, it is a time consuming and human dependent operation.

Some of the modules of Lobbytech are as follows,

**Create a badge:** The badge is shown in the same manner in which it will be printed. One can simply fill in the information at various points and generate badge would print a badge exactly it is seen on the screen.

**Sign In/Out:** When the visitor leaves the organization he/she can be signed out. This would get you the details about all the visitors in your organization at any given point of time.

**Reports:** You can create a daily / monthly report which will be the visitor register. One can search the visits by a specific visitor or even based on his/her organization.

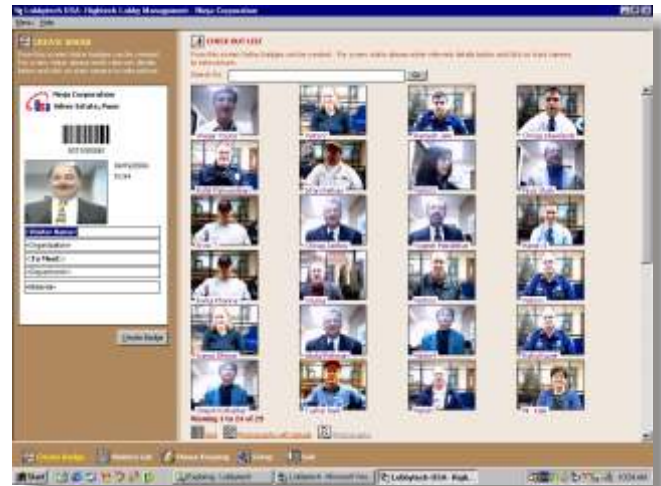

**Setup:** In the setup you can customize Lobbytech for your specific needs. you can choose your logo, Organizations name, address etc. You can choose whether you want to use a digital camera, whether you want to maintain a strict control over the data by Master update options.

**House Keeping:** You can remove the unwanted data by these options. So you can delete all those records you are not interested in by this option.

**Design your own badge:** Every organization would like to design a badge as per their own requirement. The safety declarations, logo of the organization etc. can also be placed on the badge.

**System requirements:**

Windows 95, 98, 2k, NT, XP  
256 Mb RAM & above  
Minimum 20Mb free disk space  
Webcam

An ISO 9001:2000 Company
