

Lobbytech + is the advance version for power users. It has many powerful features like the pre-registered users, email interface, better badge design etc..

Following are the advantages of Lobbytech + over Lobbytech....

Email Interface - you can pre-register visitors by sending a simple email to the reception machine. The reception machine would keep on fetching the mails and once a mail is found in proper format can simply interpret and populate the data.

Powerful badge designing - The badge design of Lobbytech + is very powerful as compared to Lobbytech. You can add labels, background color / photograph and also various signs like 'No smoking' etc on the badge. You can type the complete NDA or Security Policy on the badge.

Type of visitor - With Lobbytech + one can specify the type of visitor and also print a color band on every badge. This can help in enhancing the control over the movement of the visitors in the premise.

Email reporting - Lobbytech + can be set to send a daily report via email at a specific time. This mail can be sent to various concerned persons.

Data Import - You can import the employee data from a CSV file in the database and save the data entry efforts.

Scan visitors - In case you wish to compare the photograph of a specific person with various visitors to your organization, you can do the same by this simple interface. Here all the archival photographs would be displayed along with the photograph to be compared..

Following are the main modules of Lobbytech +

Create a Visitor badge: The visitor badge (Visitor ID) is shown in the same manner in which it will be printed. One can simply fill in the information at various points and generate a visitor badge would look exactly it is seen on the screen. Lobbytech + also offers the facility of creating the badge for a pre-registered user.

Sign Out: When the visitor leaves the organization he/she can be signed out. This would get you the details about all the visitors in your organization at any given point of time. This information can be vital in case of an emergency.

Reports: You can create a daily / monthly report which will be the visitor Register or a visitor book. One can search the visits by a specific visitor or even based on his/her organization. These reports can be sent to specific email ids via mail. These mails can either go directly or at your instruction.

Setup: In the setup you can customize Lobbytech for your specific needs. You can choose your logo, Organizations name, address etc. You can choose whether you want to use a digital camera, whether you want to maintain a strict control over the data by Master update options. You can import some important data like the employee details etc.

House Keeping: You can remove the unwanted data by these options. So you can delete all those records you are not interested in by this option.

Design your own badge: Every organization would like to design a visitor badge / ID as per their own requirement. The safety declarations, logo of the organization etc. can also be placed on the badge. Lobbytech + also offer the facility to put various logos on the badge

Salient Features:

WYSIWYG interface - The gate pass is shown in the same manner in which it would be printed hence there are no last minutes surprises on what you would finally get.

Control panel of visitors - Simple control panel showing all the visitors within the premise.

Different display interfaces - Show the list of visitors in different formats like Photograph, Photograph with information and Grid.

Simple checkout - Check out the visitor when he leaves the organization by simply double clicking the photograph.

Visitor Register - Print a visitor register with all the details like the name, organization name, date, time etc.

Color Bands - Color bands can be printed for different type of visitors and also the type of visitor can be printed on the badge.

Data Import - Important data can be imported from CSV files.
